The informal discussion of several was present at the meeting and made a statement: States and Canada, together with about \$2000 worth of machinery, patterns and stock on hand. The committee feels favorably disposed toward the machine and the proposition made.

It will be remembered that Mr. Potter gave an exhibition of his tile ditcher in operation bere last fall, at which time it did very satisfactory work. The machine is quite highly recommended. We append a couple leatimonials, both of which are from reliable sources:

I saw Mr. Potter's Ditcher work some three years ago. Thought it superior to all others, having witnessed them at the trial at Columbia, and at Mr. Reber's, at Marion.

DELAWARE, Dec. 24, 1889. Having made 600 rods of ditch 21 feet deep and over with the Potter Tile Drain Ditcher, I take great pleasnre in recommending its working qualities. It is one of the greatest laor saving machines that I have ever had occasion to use, and to say it will do the work of ten to tifteen men is no exaggeration. All who witnessed the exaggeration An who winessed the working of this machine were lond in its praise, and it surprised everybody. I confidentially believe that wherever this machine is introduced ditching with the spade is past.

Gen. Gibson to the Farmers.

At the Seneca County Farmers' Institute held last week Gen. Gibson made an address which contained many good points for the consideration of farmers. He showed by unquestioned statistics that the farmers are not nearly so had off as they have been in the habit of thinking. He brought forward the figures to show that the farmers of Seneca county have an average wealth of six thousand dollars gentler. That the farm mortgages are each; that the farm mortgages are being paid off more rapidly than they are accumulating. He said it was popular to grumble, and he didn't know but what it did a fellow good to grunble once in a while, but he wanted to ney pot hat crowning a tasteful costum show the Seneca county farmers that reduces it to reduce. Blackwood's they ought to be more peaceful and Magazin ; happy than any other class of people.

The General advocated raising the state revenues from taxing corporations, and illustrated the system which has proved so satisfactory in Tenosylvania. The idea of government ownership of railroads and telegraph, lines he deemed ill-advised. He bade the farmers to be in good cheer for a brighter day is coming. England has been experimenting with wheat raising in India, and every American has been fearing that therein lay his greatest for, but it is now being made manifest that the fellows down in India, who have been living on rice are learning to eat flour, and India won't be able to raise enough to supply them. This is of tive years he expects to see prices of wheat, all farm productions as it to farms greatly increased.

A REMARKABLE DEATH SENTENCE

Marderer the Queerest on Record.

ever sat upon the far western bench was Kirby Benedict, who for thirteen years from in it.

Was a justice of the supreme court of the New Mexico, having been first appointed in 1853 by President Pierce and reappointed by President Buchanan, and appointed chief justice of the court by President Lincola. He was a man of great ability and learning, strong in his prejudices, violent in his passions and releatless in his convictions.

There are many anecdotes told of Judge Benedict. But the crowning act of his judicial career was the sentence of death passed by him upon a prisoner convicted of murder, which sentence was as

"Jose Maria Martin, stand up. Jose Maria Martin you have been indicted. tried and convicted by a jury of your countrymen of the crime of murder, and the dread sentence of the law. There is now traveling on the line a one armed cornet player, and a capital tune he plays, too. He has aniron hook fixed in the wooden arm, and he attaches the cornet to this, holding it in position to the lips. With the other hand he fingers the trio of keys. Another well known railway musician is the prowell known railway musician is the proprietor of a mechanical dancing nigger. It may be said to be one of the most popular entertainments now before the traveling public.

The owner of the figure stands up in the carriage—usually by the door-and in the space in front of him he places a wooden pedestal, on which the little wooden nigger of some two feet in stat ure faultlessly "steps" to everything, be it a Scotch reel or an Irish breakdown. The proprietor himself introduces the necessary music on a violin. He always has a "full bonse," for the people crowd into the carriage in which the diminutive darkey is to dance.-London Tit-

Water Does Not Move with the Wave. There is no necessary connection between the advance of a wave and the forward movement of the water composing it, as may be seen by running the fingers along the keys of a piano. An inverted wave travels along, but the keys merely move up and down. Similarly, a wave may often be observed running along the ripe ears of goldgrain while the stalks are firmly routed in the soil. The onward progress of a sea wave is easily perceptible, and by watching some light substance floating on the surface the fact is revealed that the water is not moving with the same velocity.-Chambers' Journal.
